### User Manual

Model: SP 706

#### Contents:

- 1 x No Bark Collar Device
- 1 x 4LR44 6V Battery
- 1 x Test Light
- 1 x User Manual

#### Quick start Guide

##### Step 1: Prepare the Device

Follow the Positive (+) and Negative (-) signs inside of device and put the 4LR44 6V battery into device. The LED indicated will not light up when you put the battery inside of the device. **The LED indicated light only lights up when the device is beep or start shocks.**

##### Step 2: Test the Device

1. Put the **Test Light** on the Electrodes of device. (**Both side touch the METAL**)
2. Turn the adjustment of sensor (dial) to the highest level, and blow some air into the Sensor.
3. The device will beep and the LED indicated light will light up for the first two times. (beep increase)
4. The Third time, the device will beep and static shock after beep. The Test Light will be blinking or lights up after the beep. (If there is no static shock the Test Light will not light up or blinking).

**Notice: If you did not turn the adjustment of sensor to the highest. You may need to do the air blowing harder.**

**Step 3: Put the Collar Device on and adjust the collar to fit your pet**

Put the device on your pet

To ensure a proper fit, please follow the steps below:

1. With your dog standing, center of the collar device where contact points are underneath your pet's neck, touching the skin.
2. The collar device should fit snugly, yet loose enough to allow on finger to fit between the strap and your dog's neck. If the strap is too long for your dog, cut off the excess length.
3. Allow your dog to wear the collar for few minutes and then recheck the fit. Check the fit again as your dog becomes more comfortable wearing the collar device.

**Important:**

1. **The Device is made up of plastic and electronic components that are not digestible.**
2. **The Device is controlled by microprocessor. It is automatic turn on and turns off. The microprocessor might sense other vibration or sounds from the environment occasional, please re-install the battery for the device.**
3. **The Device designed to be water resistant, but it is not fully soggy. Please remove it before you give your pet bath or allow your pet to swim.**
4. **The Electrodes have to direct contact with your pet's skin as it is very important to effective training.**
5. **This product is only for Pet Training, It is not a regular Pet Collar. Please remove it from your pet at least 8 hours out of every 24 hours.**

**How to change the batteries**

If the LED indicated light of device does not light up or the device stop working, please replace the battery.
